Sonata Case Study

Business Challenges

- Outdated rail passenger reservation system

- Client server application has limited features

- Upgradation costs too high and time consuming

- Lack of user friendliness for day-to-day operations

- Reliance on manual process for ancillary product sales

Sonata's Solution

- Rezopia Rail Platform is a next generation rail reservation system capable of addressing all our client's needs, and more.

- Cloud-based platform was able to fulfil a lengthy wish list, ranging from end to end travel reservations, contracts, operations and distribution management.

- Multi-channel booking engine consolidated bookings and generated passenger manifest reports. Users were now able to book not only a train seat with a dynamic shopping cart, but also ancillaries like hotel rooms, transfers and activities.

- In addition, the Rezopia platform was integrated with SAP to send financial data of bookings a XML. AN eNet integration ensured suppliers were automatically paid on their due dates.

Benefits

- Increased business capability with web based application and efficient process for ancillary products sales.

- Train bookings for seat and berths are available in consumer site.

- Effective handling disruptions scenarios caused by natural disasters, track repair work, station interruptions

- Enabled business with platform that supports extending to providing uniform experience to customer for packing train with products like hotel, tours

- Scalable system implemented which can sale up to 6,000 bookings per day

- Omni-Channel booking experience across various distribution channels and devices

Sonata delivers a next-generation reservation system for a government owned railway operator in Australia
