

Help Restore the Green Cover

Partner: Pangea Eco net

Grow-Trees provides a cost-effective service to corporates to enable planting of trees. These trees, grown through a network of partners in Government and community owned lands typically in the areas around wildlife reserves, can be gifted through personalized eTreeCertificates.

About the Program:

In association with Pangea Econet, Sonata sponsored the planting of 6,690 trees in remote villages of Rajasthan. We planted one tree on behalf of each recipient of our e-greeting. This eco-friendly program is designed as a gift giving program to nature.

Within the organization too we have designed the 'Go Green Initiative' – to green our work spaces. Sonata employees have planted 213 saplings in our Global Village campus in Bangalore.

Expected Outcome

Create and nurture a workplace culture of environmental preservation and sustainability.
