

Migration of on-premise applications to Azure Cloud for a Leading Brewery Company in India

CASE SUMMARY

Need

Consolidate IT infrastructure, manage storage backup better while reducing IT footprint.

Solution

Sonata created a roadmap for leveraging Azure to optimize IT infrastructure.

Benefits

Lower CapEx, easier manageability and end-to-end deployment, management and support services.

The Platformation™
Company

Business Challenge

The customer was faced with a hardware refresh of their on-premise infrastructure for Non-ERP application being hosted on physical servers. The immediate challenge was for:

- Server consolidation
- Virtualization
- Management

Since, these applications were of low to medium business impact, the customer was open to options to reduce cost of ownership and management. Customer was looking for a strong core infrastructure partner for end-to-end deployment, management and support services.

Sonata's Technology Solution

Sonata consulted with the customer and built a roadmap for staged movement of on-premise applications to Microsoft Azure Cloud. Sonata created a hybrid cloud for the customer and 11 server were virtualized and migrated to the cloud.

Post completion of the migration, Sonata also provided managed support for customer's Azure Infrastructure like

- Automation
- Rectifying sync issues
- RDS configuration
- Server creation, deletion & resizing
- Patching and updating servers
- Manage backup policies etc.

Business Benefits

- Increased cost saving
- High availability for the application
- Secured authentication
- Easier management and administration of the infrastructure
- End-to-end deployment, management and support

CUSTOMER TESTIMONIAL

“ Sonata has been associated with us for our core infrastructure migration to Cloud for cost optimization. The team has done a commendable work and we are very happy to be associated with them. ”

- Divisional Vice President
