Transform your **ERP** into an **AI-powered growth engine** with **Sonata Software**

Migrate and modernize your ERP for a future-ready enterprise

The Modernization Engineering Company | SONATA SONATA SOFTWARE | ## Microsoft Dynamics 365

Today's enterprises face relentless pressure to operate profitably while meeting evolving customer expectations and navigating complex financial and supply chain disruptions. The stark reality: 68% of employees admit they cannot keep up with the current pace and volume of work.

Why? Because traditional ERP systems are holding organizations back from:

> Sustainable growth and scalability | Real-time decision-making capabilities
> AI-powered automation that drives efficiency | Agile adaptation to market changes

Why now: The case for modernization

$3.5 Trillion in business value annually, with ERP-led automation among the top contributors

60% of midsize enterprises will adopt cloud ERP with embedded AI by 2026

The competitive imperative is clear. Organizations that delay modernization risk falling behind more agile competitors. A cloud-based, AI-powered ERP is now the foundation for resilience, scalability, and sustainable growth.

In fact, **73% of enterprise plan to upgrade their ERP** in less than two years.

The solution: AI-powered ERP with Dynamics 365

Executives must navigate complex data and make decisions faster than ever. Making sense of this information, ensuring compliance, and driving profitability are now tasks that can be seamlessly managed by AI agents in modern ERP systems.

The AI advantage is proven

90% of AI users say it boosts productivity

85% agree it helps them focus on what truly matters

Three pillars of autonomous ERP

Assistant
Handles routine tasks and keeps operations on track

Advisor
Surfaces insights, predicts trends, and guides smarter decisions

Optimizer
Orchestrates complex workflows and continuously improves processes

Together, these capabilities free teams to focus on innovation while ERP runs at the speed of business.

With Sonata's ERP accelerate program, organizations can modernize their ERP on Microsoft Dynamics 365 and unlock the full benefits of the three AI agents.

Business impact: The ROI of AI-powered ERP

Operate profitably

- 50% faster forecasting & planning
- 20% process efficiency gains

Enhance performance

- Save 40% time on customer case summaries
- Cut revenue forecast variance by 50% (to 1.6%)

Boost agility and resilience

- 2× faster automation of new capabilities
- 60% higher success with Copilot adoption
