

Build a scalable, future-ready **SAP Commerce** ecosystem

Modernize your commerce architecture to reduce operational complexity, accelerate digital growth, and scale with confidence

Many enterprises are still running commerce on fragmented, legacy ecosystems – where ERP, channels, and customer experiences operate in silos. This results in:

Rising costs

Manual processes, call center dependency, and mounting tech debt consume budgets that should drive growth.

Lost revenue

Competitors outpace you digitally. B2B buyers and B2C customers expect seamless, self-service experiences – 24/7.

Scale ceiling

Legacy platforms cannot handle high traffic, global rollouts, or new digital channels without expensive re-architecture.

Sonata's **SAP Commerce** practice delivers end-to-end modernization – from legacy platform re-architecture through to cloud-native, AI-powered commerce on CCV2 and SAP BTP. Our Lean Commerce Framework combines reverse engineering intelligence with pre-built accelerators to accelerate your transformation timeline while materially reducing execution risk. The result is a high-performance, omnichannel digital platform your teams can operate and scale with confidence.

Why global enterprises choose Sonata

Lean commerce framework

Proprietary reverse-and-forward engineering methodology – modernize faster, with significantly lower execution risk than conventional transformation approaches.

Proven in complex, high-scale environments

Delivered large-scale, multi-country SAP Commerce programs with platforms capable of handling high transaction volumes and peak demand scenarios.

Pre-built accelerators

Reusable integration assets, pricing engines, CI/CD pipelines, and caching frameworks mean faster time-to-value and reduced project cost.

Deep SAP ecosystem depth

Strong capabilities across SAP Commerce (CCV2), SAP BTP, ECC, and S/4HANA, with seamless integration across enterprise systems.

End-to-end partnership

Strategy, implementation, and managed services under one roof – a single accountable partner from blueprint to live operations.

Outcomes our clients have already achieved

10,000+

orders per hour B2B portal on CCV2 / S/4HANA for a leading cement manufacturer – enabling 24/7 dealer self-service and real-time credit controls.

50%

growth in online sales Omnichannel commerce transformation for a global travel operator – reducing call center dependency and optimizing marketing spend.

24/7

digital self-service. Multi-country B2B at scale Unified SAP Commerce across regions for a UK technology services firm – eliminating manual errors and delivering 24/7 digital self-service.
